THE GRAND PROMO-TERS OF HEALTH. HOLLOWAY'S PILLS.

Derangement of the Bowels, Liver and Stomach
Complaints.

This medicine is so well known in every part of the
world, and the curve elected by its use are so wonderfu
as to astonish every one. I spire-eminence as a remedy
for billious and liver complaints and derangements of
the stomach and bowels, is no longer a matter of dispute
or doubt. In these diseases the ben ficial effects of itolongy's invaluable Pills are so permanent and extensive,
that we wone system is "movated, the organs of the cotion strengthened, and full and easy assimilation proceeted, so that both physical and moral energy are increasad.

Determination of Blood to the Head. This is generally occasioned by some irregularity (1th stomach and bowels, which, if not queekly attended of requently terminates that ally. A few does so it here to mous 'lls never fail to give tone to the stomach request y to the secretions, and purily to the dids. Veitca timuess of eight and other indications of approaching pupilexy, are on irely dissipated by a course of this admirable medicine.

The Female's Best Friend For all debilitating disorders peculiar to t

The Female's Best Friend
For all debilitating disorders proculiar to the warm. The every contingency perilons to the life of womon, youthful or agod, married or single, this mild but speedy remedy is recommended with friendly a varnestness. It will correct all functional derangements to which they are subject.

Scrofula and all Skin Diseases.

arosubject.

Scrofuls and all Skin Diseases.

For all gain diseases, howeve investorate, those medicines are asovereign remody. While the brills act upon the blood, which they pu fig, the outment passes through the pores of the sin, and classise every structure, as water saturates be soilor as sail penetrates meat. The whole plays all machinery is thus rendered healthy, regular and valorous.

No medicine will cure codes of long duration or sach as a passettled upon the chest so quickly as these famous Phile. Even in cases where the first single of asthmas has appaired these Phile may be relied on as a certain and revertailing remedy, particularly if the Ointment be similtaneously well rubbed into the chest and throat night and morning.

Integestion—Billious Headache.

These compliants may sometimes becomidered trifling put it should be borned in mind that by inattention and neglect, they often end most seriously. Give early inought to a doranged stomach take followay's Phile, rub his edicharted Oint ent over the pit of the stomach, and you will shortly preceive a change for the better in your algestion; spirits, appetite, strongth and energy. The improvement, though it may be gradual will be thoroug and lasting. improvement, though it may be gradual will be theroug and nating.

Holloway's Pills are the best remedy known in the world for the following diseases:

AYER'S Sarsaparilla

FOR PURIFYING THE BLOOD, And for the speedy our of the following complaints:

Scrofuln and Scrofulous Affections, such as Tumors. Ulcers, Sores, Kruptions, Fingles, Fusciles, Blois, Blains, and Scrofulous Infections. Bothese. Boils, Blains, and Oakland, Ind., 6th June, 1859.

J. C. Ayran & Co. Genits: I feel it my duty to acknowledge what your Sarsaparilla has done for me. Having inherited a Scrofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arms; sometimes it turned inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description. I tried many medicines and several physicians, but without much relief from anything. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alterative (Sarsaparilla), for I knew from your Tend in the Gospel Messenger that you had prepared an alterative (Carsaparilla), for I knew from your freed in the cost high and got it, and used it till it cured me. I took it, as you advise, in small doses of a tenspoonful over a month, and used almost three bottles. New and healthy skin soon began to form under the scab, which shor a while fell off. My skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the aposites of the age, and remain ever gratefully.

St. Anthony's Fire, Ruse or Eryspielas, Teiter and Sult Rheum, Scald Head,

Dyspepsia, Heart Disease, Fits, Epilepsy, we are confident that this will do for them all that medicine can do.

Ayer's Cherry Pectoral,

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF
Coughs, Colds, Influenza, Hourseness,
Croup, Bronchitis, Incipient Consumption, and for the Relief
of Consumptive Patients
in advanced Stages
of the Disease.

This is a remedy so universally known to surpass
any other for the cure of throat and lung complaints,
that it is useless here to publish the evidence of its
virtues. Its unrivalled excellence for coughs and
colds, and its truly wonderful cures of pulmonary
disease, have made it known throughout the civilized nations of the earth. Few are the communities,
or even families, among them who have not some
personal experience of its effects—some living
trophy in their midst of its victory over the subtle
As all know the dreadful fatality of these disorders,
and as they know, too, the effects of this remove,
As all know the dreadful fatality of these disorders,
and such known, too, the effects of this remove,
we need not do more than to assure them that it has
now all the virtues that it did have when making
the cures which have wone strongly upon the
confidence of mankind.

Retrenchment-Where Shall It Begin? The latter part of the article upon British Columbia and its Capital, which we extracted from fa late London paper, and published in our issue of Tuesday last, so entirely accords with the views of the great majority of the people of the Colony, that we think it due to the writer, who has thus come forward to aid us in England with his pen, to draw attention to the necessity which he has so truthfully pointed out, of a change in the Governor of the Colony, before, as he says, the "full measure of benefit to be derived from a union of interests in one centre of action can be realized." If the Governor has any real opinions of his own about the state of the Colony, he has, so far as we can judge from the very limited opportunities we have enjoyed of forming any opinion from his public acts, deeds and words, allowed them to be warped by prejudice and predilections." It is admitted on all sides that a Governor who was not in any way identified with either of the two colonies before the union, would be more likely to succeed in administering the affairs of the united Colony to the satisfaction of all partiss here, and this cannot be too strongly urged upon the mome dovernment. But if there is a necessity for change, it exists not only at headquarters. There are always some members of the Government of a colony not possessing, and as some say not suffi, ciently advanced for responsible government, who from their position can do much to advance or retard the true interests of the country. Those who have access to such dispatches from the Home Government as are not intended solely for the Governor's peru. sal, cannot help being fully cognizant of the ideas of the Colonial Office. and it is very desirable that most persons should be entirely free from bias or prejudice. When the severance of British Columbia from Vancouver Island occurred, it became necessary to appoint separate officers to administer the Government of the two Colonies. Amongst others it was thought necessary for each Colony to have a Colonial Secretary, that is to say a subordinate Government Officer to do a part of the Governor's work When the union took place there were margin. In the colonies youths of the two Colonial Secretaries to be proinat age are workingmen and often vided for in some way-the one posfathers of families. sessed of abilities above the average and with considerable administrative talent for so young a man, was unacceptable to those who desired to concentrate the business in the largest and most accessible town in the United Colony, by reason of his being a strong partisan of the ciaims of end city which had been the seat of government of the separate Colony to which he had belonged; the other whose principal claims were length of service, had probably been too long connected with Vancouver Island to be acceptable to a Governor with very strong predilections in favor of the mainland. What does the Governor do under such circumstances? The very natural course of a prudent man, would have been to recommend both gentlemen to the favorable notice of the Colonial Office for appointments elsewhere; but no, the first and gravest error that Mr Seymour committed when attempting to reorganize the service, and acting under instructions to retrench, was to retain both gentlemen in the pay of the Colony, in the service we cannot say; manifestly the Governor having himself been an absentee, looked to the two Colonial Secre taries as the men most capable of rendering him assistance in rearranging the affairs of the Colony, and so they ought to have been from the knowledge which they might have acquired in their depart. ments. If both Colonial Secretaries had been otherwise provided for, and had, with other old officials whose connection with the government of either colony had ceased, been prior to their departure constituted a commission to advise with the Governor upon the best means of retrenchment, some good might have resulted. But here, as in other instances which have come under notice, the Governor's want of decision of character leads him into the commission of an act of great

injustice to the Colony; it is not however

too late; we have, as it appears, no Col-

onial Secretary at present, the gentleman

who signs the notices in the Gazette,

"By His Excellency's Command," does

not apparently hold even the acting no-

eition, then why ret abolish the offer

altogether.

Mr. Whitworth's scholarships for Mechanical Science.

In the Government Gazette of Saturday last is published a circular respecting these scholarships which are to be open to all of Her Majesty's subjects, whether of the United Kingdom, India, or the Colonies, who do not exm ceed the age of twenty-six years, the endowment is most liberal and exemplary, and provides for thirty scholarships tenable for two or three years as experience may prove to be desirable. The Lords of the Committee of the Council on Education are to undertake the examinations; the competition for the first ten scholarships of £100 each will take place in May, 1869, in the meantime Mr. Whitworth has placed sixty exhibitions or premiums of £25 each, tenable until April, 1869, at the disposal of the governing bodies of certain Educational Institutions in England; to assist youths under twenty-two years of age to qualify themselves, all holders of the £25 exhibition must undertake to compete for the £100 scholarship in May, 1869. The examination will include mathematics, mechanics freehand and mechanical drawing, and chemistry, besides these, a knowledge of certain handicrafts and the use of certain tools will be required. The successful candidates will have to carry on their studies either in arts and sciences, or to complete their general education, and may for this purpose go to the Universities or travel abroad, according as they themselves may select, subject to the approval of the Lord President of the Council. The successful artizans are to be encouraged to study theory, and successful competitors in theory are to be sided in getting admission to machine shops and other practical establishments. The ultimate income free the and the to the test the transfer to and public aid to create, if practicable, a faculty of industry analagous to the existing faculties of Divinity, Law, and Medicine. This is a truly munificent endowment, and the heads of our schools in the Colony will do well to keep it in view for future years, the first ten scholarships will no doubt be carried off by some of the sixty exhibitioners, but hereafter there will be nothing to prevent any of our youths, having a taste for mechanical science, from competing for these scholarships. A successful candidate from a colony would reap the advantage of being assisted for two or three years to pursue a course of study in England he cannot attain bere. As the whole regulation of the examinations is to be left to the Council on Education, arrangements will probably be made by them respecting the age

SENSIBLE MAN .- Two strangers were discussing a few days since the vitality of this Colony-the one judging from what he saw in our daily life in this city, that it was deadthe other, judging from things that did not appear in every day life, that it had as much vitality yet as any place on the coast. The mode of illustration was unquestionably logical and is interesting to us all. Do you know, asked the latter, what her population is; what her Governmental expenditure, or the amount she annually sends over to Oregon and Washington Territory for produce stuff of all sorts? No, I cannot say I do, replied the one who thought the Colony dead beyond redemption. Well then, I will tell you. As nearly as can be ascertained, the white population is supposed to be 12,000, with some 60,000 Indians and others, equal to about 8000 additional, who directly and indirectly pay taxes, or otherwise contribute to the revenue. These 20,000 people expend every year \$750,000 for their Governmental expenses, besides paying Oregon and Washington Territory nearly \$1 000,000 more, for what they ought to produce themselves. The unbeliever was amazed for a moment at this statement, and then thoughtfully replied: Why, if that is so, and I know you always look into these things, she belies her appearance and beats Oregon out of time Her none lation is 65,000; her revenue \$332,443; her expenditure \$292,304; and the difference is more striking when we recollect, that Oregon is the oldest and British

is truer than this dialogue, nothing more outrageous than the facts it elucidates. It is even so that this Colony has yet marvellous vitality, and it would be well if her own people could see it as well as strangers. Our lukewarmness and want of confidence is shown in her resources being so vilely abused, and ber revenues exhausted in things utterly useless to us. The Governmental expenditure of this Colony ought, under no circumstances, to cost over \$200,000 a-year, if Oregon is any guide to economical management: BANQUET TO CYRUS W FIELD, Ecq .- The banquet given in London to Mr Field for his untiring energy and devotion to conneot the old and new world by telegraph,

Columbia the youngest settlement upon the

coast. The thing is marvellous. Nothing

took place in the first week in July, the Duke of Argyle presiding. The principal speakers on the occasion were the Chiarman. the honored guest, Mr Field, Sir S Northcote, Sir J Pakington and Mr Bright. The speech of the latter is in his usual style, and teems with eloquence, with liberal and enlightened views of the harmony of the two countries thus connected by every tie, to work together for the good of the world Telegrams were sent by the meeting to the President of the United States, Lord Monck of Canada, the Governor-General of Cuba, the Governors of Newfoundland and British Columbia, to respond to the toast. Appropriate replies were recieved from all the others, but we coufess our own to be a little 'mixed.' 'Columbia,' it says, 'joins heartily in the cheers with which the toast, 'Cyrus

the telegraph ; this day's news from England; instantaneous communication with the gold mines, 600 miles distant; thus Police strength eventually doubled; weather fine here; mines and farms flourishing; wages high; revenue improving. Your son Lord George, with us and well." No doubt it would be gratifying to His Grace of Argyle to hear his son was well, and in such good society, but what that fact has to do with the banquet in question we do not preplasly see. Some might say also that it would have been equally well to have kept -out our material and financial interests from a message of a social and complimentary nature. It is always well, however, to have an eye to business, and truly this was too good a chance to advertise us to a large and influential London audience. But to return to the dinner; it was a magnificent success. In honoring so distinguished a man as Mr Field, England honored herself; and the compliment will not soon be forgotten in America. According to the Chairman, there were over three hundred persons present; the tenor of the speeches generally shows, the greatest enthusiasm to have prevailed.

THE ESQUIMALT DOCK .- His Excellency the Governor is in receipt of recent correspondence from England relative to the conatruction of the much talked of dock at Esquimalt. We hear that a joint stock company has been formed, with a capital of £80,000, for the purpose of the construction. and that the Imperial Government have conserted to guarantee at the rate of 4 per cent which has been agreed to. We can't say at what particular time the work will be commenced, but it is believed it will be begun at an early date. Some reports state that perhaps convict labor will be in part employed. Others, that contractors, machanics, &c, will be engaged in England. Be this as it may, although the public of course, would much prefer seeing Colonial labor entirely employed—the undertaking would be hailed with every gratification by the Colony in general. We hope shortly to be able to give more definite information in regard to so important a subject. In connection, a rumor is current that a regiment

of soldiers will be sent to the Colony.

FROM NEW WESTMINSTER.—The steamer Fly arrived last night at 11 o'clock, with fifteen passengers and a Cariboo express. Sixthe principal claims on William Creek yielded for the week 765 oze, the highest individual claim being the Taylor, 130 oz. On Stout's Gulch 5 claims yielded 441 z, the highest, the Taftvale, being 180oz. On Mosquito Gulch 6 claims, yielded 5380z. the Minnehaha topping the list with .270oz. On Grouse Creek the Flume co washed up 463oz, while the Calveras, on Lowhee Creek, paid 150oz. From the other creeks there is nothing important. The Sentinel notices number of new strikes. The jury in the case of Regina vs. Knight returned a verdict of not guilty. Mr Jas Lawrence had arrived at Yale with a drove of 2300 sheep from Oregon.

THE Fenians under Gen. O'Neill have made the threatened demonstration Canadaward, and produced a decided result. They have had eight tons of their weapons and war material unexpectedly pounced upon by the United States officers, and the two hemispheres, and especially the Dominion of Canada, are now pondering that great fact. Eight tone of possible ravage, conflagration and homicide make a thrilling report and a strong sensation; and though these have been "nipped in the bud," the Capadians must feel that they themselves have had "a very narrow escape." But they have no security against a renewal of this deadly sort of strategy. More tons will be gathered together at some other "certain place," and nore Fenian outbursts will be gobbled up,-N. Y. Herald

Police Count.-John Costano, an Ameri ean seaman, charged one of the lordly sons of the forest with assaulting him, and the lordly son of the forest reciprocated by a counter charge of the same nature against Costano. It was probable "lovely woman" was the cause of the strife, and His Wership fined them \$10 each Andrew Coyle, charged with selling liquor to Indians, was remanded two days for sentence. A number of lazy miserables have come to grief lately by the vigiand it seems impossible to break up the vile gang of Indian whiskey sellers.

EDUCATIONAL .- The Board of Education met yesterday at the residence of Dr Powell, the Chairman. Two additional teachers were appointed-one to Salt Spring Island. and one to Saanich. The settlers of these districts have long been bearing the entire cost of their schools, and it is time they received some aid from the public funds.

Auction Sale .- We are requested to direct the attention of the public to the interesting sale of W K Bull's entire stock in trade, which commences at 11 o'clock, sharp. The goods will be on view from 8 o'clock;

INSPECTION-The Admiral has inspected the Sparrowhawk preparatory to her being paid off, and has expressed himself much pleased with the state in which everything in connection with her was found.

NEW Sters .- The long needed repairs in the side-walk steps at the intersection of Government and Humboldt streets, have at last been effected, much to the convenience safety and satisfaction of the public.

CRICKET MATCH.-A match between the married and single cricketers of this place will be played on Saturday next, on Beacon Hill. Wickets will be pitched at 12 o'clock. A good game is anticipated.

Bankruptcy Court.

(Before Chief Justice Needham.)

Wednesday, 12th Aug, 1868. In the matter of George Halls-Dr Tuzo appeared in obedience to a summons issued by Mr Bishop, acting for one of the creditors, under this bankruptcy, and produced deeds of section XX, Lake District, which had been mortgaged by Mason & Balls to Dr. Tuzo, and had been sold by that gentleman in June 1867, for \$1245, the amount owing on the mortgage being \$600. Dr Tuzo held a second mortgage-from Balls on his share of said property to secure \$1000, this security had been given shortly before the bank. ruptoy. Mr Sebright Green, on behalf of the assignees, supported Mr Bishop in claiming any balance of the purchase money that might remain after payment of the first mortgage. Dr Turo consented to leave the down on the roads and at their homes, with shortly after united by Act of Parliament question of the validity of the second mort- out any steps oring taken to oring the The representative Government of Vansente to Chief Institute Institute of the Twellth convey Island, was abolighed without a gage to the Chief Justice. It was stated that if the brick buildings on Rae street belonging to this estate could be sold for \$750, there might be a dividend of fifty cents on the dollar for the creditors, if Dr Tuzo gave up his claim on the second mortgage and came in as a creditor. Dr Tuzo having proposed to make an offer for the brick buildings, the case was postponed for a fortnight in order if possible to effect some arrange

In the matter of James Wilcox-There being no opposition, this bankrupt was allowed to pass his first examination, on the application of Mr Bishop.

In the matter of Paris Carter-Mrs Martin, a creditor in person, applied for an order to compel the bankrupt to pay the amount of her claim. Mr Sebright Green for bankrupt said that an offer had been made to Mrs Martin which she at first accepted but subsequently refused. No order was made.

Holloway's Pills —Indigestion and Liver Complaints.—The digestion cannot be long or seriously disordered without the derangement being porceptible on the countenance. These Pills prevent both unpleasant consequences; they improve the appetite and with the increase of desire for food, they augment the powers of digestion and assimilation in the stomech. Holloway's Pills deal most satisfactorily with deranged or diseased conditions of the many organs engaged in extracting nourishment for our bodies from our various diets—as the liver, stomach, and bowels, over all of which they exercise the most salutary control. By resorting at an early stage of this maindy to these purifying and laxative Pills, the dyspeptic is speedily restored to health and strength, and his sallowness gradually vanishes.

IF PROPLE WHO SUFFER from dull stupidity If PROPLE WHO SUFFER from dull stupidity that meets us everywhere in spring, and soo often in all seasons of the year, knew how quick it could be cured by taking Ayen's Sansarantula to purge the bile from their systems, we should have better lock burners well as clearer heads to deal with

Municipal Council.

His Worship the Mayor Presiding.

Tuesday, 11th Aug, 1868. Present-Councillors Allatt, Crump, Gibbs Jeffrey, and McKay. The minutes of previous meeting read and

adopted. Communication from L Lowenberg explanatory of a previous communication was read. On motion ordered to be laid on table. Communication from the Colonial Secre-

tary in relation to the Municipal Pound Bylaw, with enclosure, read. On motion, the Mayor was requested to reply to said communication. Communication from the committee of

the Victoria Turn Verein, applying for permission to remove their gymnasium to the vacant lot belonging to Mrs Blinkhorn at the corner of Yates and Broad streets. On motion permission granted.

On motion a further sum of \$250 was voted to Mr George Stelly on the balance of his account of \$500 was ordered to be paid On motion the Council adjourned till Tuesday next, unless previously convened by the

By Glectric Telegraph.

TELEGRAPHIC DISPATCHES.

Eastern States.

Washington, July 6-Regulations for al-WASHINGTON, July 6—Regulations for al-lowances and drawbacks on alco hol and rum under the new law were issued this morning. These are the only articles on which a draw-back is allowed. Alcohol must be eight degrees above proof, and in quantities of not less than 20,000 gallons. These regulations take effect immediately.

CHICAGO, Aug 6—The cattle disease is making sad bavec in many localities in Central and Southern Illnois. The disease is said to be fatal in every case, A commission of scientific gentlemen has been sent by the Pork Packers' Association of this city, to disease, and they report that it is directly traceable to Texas cattle, which are imported

into this State contrary to law.

Washington, Aug 6—Gov. Warmouth's official requisition for force to secure order in official requisition for force to secure of the Coulsiana was presented to the President yesterday by Col Dears, of the Governor's staff. Gov Warmouth presents various letters from citizens and officers, setting forth the terrible citizens and omers, setting forth the terriore courages daily being perpetrated in all portions of the State. He says that in many parishes there exists no protection for citizens in the courts—that men are shot bedied in a bill, and the two colonies below the says that in many the says that the Judicial District has refused to go to the Franklin Parish without a force is sent to protect him. Prominent Ucion men in the parish write that their homes are beset by desperadoes, and their lives thus far have been saved by the arrival of men who volun-teered to guard them. The Governor has no doubt but that one hundred and fifty men have been murdered in Louisiana during the last month and a half. It seems to be the settled determination by rebels either to kill or drive away Union white men and leading colored, so as to be able to terrify the masses of oclored people into voting as they dictate. In conclusion the Governor says he believes a bloody revolution is meditated, and asks for two regiments of cavalry, a regiment of in-fantry, and a battery of artillery, to enable him to suppress violence, arrest criminals, and protect officers.

The British North American Overland

The following is the petition of Mr. Waddington, lately presented to the Imperial Parliament, and before alluded to by us:-To the Honourable the Commons of the

United Kingdom of Great Britain and Ireland, in Parliament assembled. The humble petition and memorial of

the undersigned Alfred Waddington sheweth,-

That your petitioner is from Victoria Vancouver Island, where he has considerable interests, as well as on the mainland in British Columbia, and that he desires to bring under the consideration of your honourable House certain facts in connection with that colony which are of such magnitude that they may ultimately for some time suspended, the colony is suffect the interests of the whole British suck in debt, the trade of Victoria has nation as regards-its-2022-2022-2025-with the been annihilated, the population has dwindled to a shadow; those who remain East.

That at present England has no direct or postal communication with the Pacific, save via New York and San Francisco; and in case of a war with the United States, the only possible direct postal line would be through her own territory

across the Rocky Mountains. That, moreover, the Central Pacific Railroad from New York to San Francisco is rapidly progressing and will be opened in 1870. That besides being fed by an immense "way" traffic, passengers and mails, precious metals and the lighter and costlier kinds of goods will follow that route; the commercial correspondence of one-half of the globe will pass over it; a line of first-class steamers has been subsidised to connect with it and are already running to China and Japan; and its undisguised aim is to divert the trade of China, Japan, New Zealand, and the Australian colonies from the old to the New World.

That, nevertheless, nature has gifted British North America with a line of country far superior and better adapted for an overland railroad than that through the United States, and, pending such an undertaking, with water communications of the very first order, and which only require a few connecting links to make them immediately available during seven or eight months in the year.

That the line would pass over one of the richest and most fertile regions of the world, viz, the plain of the Saskatchewan extending from near the Lake of the Woods to the Rocky Mountains; and then through the Yellow or Leather Head Pass (the lowest and easiest break in the whole range), thence down the Upper Fraser by the Cariboo Gold Mines, and over the Chilcoaten plain (the only one of any extent in British Columbia) and through the Cascade or Coast Range by a level valley to Bute Inlet, on the Gulf of Georgia, whence there is easy inland navigation to Victoria, Vancouver Island.

That the details of this line of road, which was so far entirely unknown to the public, have been carefully studied by your petitioner, and those relative to the portion through British Columbia, explored entirely at his own expense. Thate they were recammented to be

members of the Senate and House of Commons in Ottawa, at a meeting held in December at their own request in the Government buildings there; when they expressed their surprise and gratification at the unexpected facilities thus offered; and since their in a paper read at the Royal Geographical Society in London. That the cost of opening this line of communication would be trifling with the

communication would be trifling with the assistance of a liberal grant of land to your petitioner from the Home Govern-ment for the portion through British Columbia, and that the whole could be easily effected within two years; when England would, without any pecuniary disbursement, and pending the construction of a railroad which must soon follow have an immediate road of her own, with two of the finest harbours in the world and abundance of coal at the termini, and which, when completed, will be the most direct possible route to the East.

That for that purpose, however, British Columbia is the key of the Pacific, and that unless a different policy be adopted towards that colony in future, England must be prepared to lose it—owing partly to its distance from the home country and the consequent cost of emigration, partly to its being hemmed in by the United States, but above all to the deep disaffection occasioned by misrule and the arbitrary nature of its present institutions, so

different from those that surround it That Vancouver Island and the main land were till lately separate colonies, with one and the same Governor; when, unfortunately for both, two distinct Governors were appointed over a total popula tion of ten or twelve thousand souls. That from that moment a system of commercial aggression, if not hostility, towards Vancouver Island was adopted by the Government of the mainland brought to such a state, in a fit of despair the House of Assembly in Victoria petitioned the Home Government for union of the two colonies, and, fondly trusting to the liberality of the mothercountry, offered (without asking the consent of the people) to accept whatever institutions she might think fit to grant.

couver Island was abolished without dissenting voice in either House, the free port of Victoria done away with, and the hostile Governor of the mainland re-appointed over the united colonies, with a Legislative Council consisting of 22 mempers, of whom fourteen were appointed by himself and the eight other elected sub ject to his approval. The capital was renoved to New Westminster a village of 700 inhabitants, the officials there alone maintained, those of Vancouver Island discharged, and the general welfare of the colony thenceforth sacrificed to local interests.

That although Vancouver Island commands the coasts of the United States on the Pacific as completely as England ommands those of France on the Atlan tic. the Home Government has never spent anything on it; the colony, though yielding over half a million of gold yearly is indebted to the United States for the carriage of every emigrant and every let-ter that reaches her shores; and if a man of war require repairs, she must go to San Francisco, thus depriving the colony of the benefit of an expenditure which ought naturally to accrue to her. In short the only ties that bind the colony to the mother country are the infliction on it of a despotic form of government; an expenditure over which the people practically have no control and is out of all proportion with the means of the colony; and a Governor with a salary of £4000 a year with other allowances, who only consults the interests and wishes of the very smallest portion of the colony; so that although all public improvements have been

less some more real interest is evinced for the colony, when the occasion offers, she may be driven to vote for annexation to

But British Columbia is the key to the North Pacific. Without her and the Saskatchewan territory, the very exist-ence of Canada as a British dependency would be compromised, and before long at an end. The United States are al ready knocking at the door, and if the whole of British North America is not speedily connected by an overland communication or by railroad, England may bid adieu for ever not only to Canada, but to the greater portion of her trade with the East, and, as a consequence, to

her commercial supremacy,
Your petitioner, therefore, humbly but nost earnestly prays that your honorable House will be pleased to institute an in quiry into the aforesaid grievances, and at the same time take such other measures towards opening or encouraging the opening of an overland communication shrough British North America, the establishment of a graving dock on Van-couver Island, and the subsidising of a line of mail steamers, as in its wisdom it may deem most proper, to avert the above fearful consequences.

And your petitioner, as in duty bound, will ever pray, &c.,
ALFRED WADDINGTON. Tavistock Hotel, Covent Garden, May 25, 1868

The Poisons of the Day.

The late temperance investigations in Massachusetts have thrown a flood of light on the horrible abuses practiced in the liquor trade, and have at the same time demonstrated the absolute necessity for unadulterated diffusive ctimulants for medicinal purposes. diffusive estimalants for medicinal purposes. Clergymen of the highest standing, men of the highest rank in science, and philanthrospists, whe are above the reach of prejudice, have testified not only to the pernicious effects of the adulterated liquors of commerce, but also to the efficacy of uncontaminated alcoholic tonics as remedial and restorative agents. First on the list of this class of preparations, best known and most extensively used of all the stomachies of the day, stands HOSTETTER'S STOMACH BITTERS. This specifies the only representative of the tablectory. the only representative of that absolutel pure article which eminent divines, chemists

the best antidotes and restoratives that bo tanical science, in its world-wide research, ha tanical science, in its world-wide research, has yet discovered. It is an indubitable fact that some constitutions and habits of body demand stimulation, and for all such a stimulant which combines anti-bilious and slightly aperient properties with its tonic virtues is manifestly desirable.

French Medicines,

PREPARED BY

GRIMAULT&CO

Chemists to H.I.P. Prince Napoleon,

PARIS.

THESE different medicines represent the most recor edical disoveries, founded on the principles of Chemistry and Therapeutics. They must not be confounded with secret or quack medicines, as their names suffici ently indicate their composition; a circumstance which has caused them to be appreciated and prescribed by the Faculty in the whole world. They widely differ from those numerous medicines advertised in the public papers as able to cure every possible disease, as they are applicable only to but a very few complaints. The most stringent laws exist in France with regard to the sale of medical preparations, and only those which have undergone an examination by the Academy of Medicine and bave been proved efficacious, either in the hospitals or in the practice of the first medicalmen, are authorised by the Government. This fact must be a guarantee for the excellence of Messrs. Grimnult et Co.'s Medi-

NO MORE COD LIVER OIL!

Grimault's Syrup of Iodized Horse Radish.

This medicine has been administered with the utmost success in the Hospitals of Paris. It is a perfect substitute for Cod Liver Oil, and has been found most beneficia in Diseases of the Chest, Scrofula, Lymphatic Disorders, Green Sickness, Muscular Atony, and Loss of Appetite. It regenerates the constituton in hand me can organistic nouth, with worth bouter depurgative known. It has also been applied with happy esults in Diseases o the Skin. Further, it will be Humors and Obstructions of the Glands.

Grimault's Syrup of Hypophosphite of Lime.

NSUMPTION CURED!

This new medicine is considered to be a sovereign remedy in case of Phthisis and other Disenses of the Lungs. It promptly removes the most serious symp toms. The cough is relieved, night perspirations ceas and the patient is rapidly restored to health.

N.B.—Be sure to see that the signature of Grimaul & Co, is affixed to the bottle, as this Syrup is liable to
